

The French Institutes of the Nordic Countries hold this autumn a series of conferences on the theme "Big data"

The French Institute of Sweden, Europahuset (House of Europe) and the Royal Institute of Technology in Stockholm (KTH) are organizing a one-day event on "Big Data and Health" on September 25th, from 8:30 am to 4 pm in Stockholm.

[How to design and implement research and medical care based on "Big Data" technologies?](#)

The morning conference at the Europahuset will welcome several experts and stakeholders to discuss the impact of the new European regulations on data protection on research and care.

The legal aspects of this regulation will be discussed before a presentation of innovative projects based on the exploitation of mass data.

An introduction to the upcoming [H2020 program](#) calls on health will follow the conference.

The afternoon will be devoted to professional workshops at KTH aimed at developing Franco-Swedish collaborations within the framework of the H2020 program:

WELCOME !

The "Big Data and Health" event is part of a series of four events organized by the French Institutes in the Nordic countries in 2017 to explore the theme of Big Data:

- Big Data and Energy, Norway;
- Big Data, Agriculture and Food, Denmark;
- Big Data and Health, Sweden;
- Big Data and smart cities, Finland.
